### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Receipt is acknowledged of the amendment filed on November 8, 2007, which has been fully considered in this action.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2 and 4-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Laauwe.

Laauwe discloses a fluid product spray head comprising all the featured elements of the instant invention, note obturator 17, sleeve 7/9 and at least one non-radial channel 31, except for the at least one non-radial channel extending obliquely in the lateral wall of the sleeve. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have the at least one non-radial channel extend obliquely in the lateral wall of the sleeve of Laauwe, since such a modification would facilitate(i.e. accelerate) the flow through the channels prior to entrance into the swirling chamber and would enhance the expansion and swirling within the chamber.

*Response to Arguments*

4. Applicant's arguments filed November 8, 2007 have been fully considered but they are not persuasive.

Applicant argues that claim 1 requires an oblique non-radial channel in the lateral wall of the sleeve, which is not conditioned on(i.e. independently of) the position of the closure element(obturator), note that as currently presented and amended the claim does not require the condition in which the position of the obturator in order to meet the claim limitations and therefore , the argument is considered moot.

*Conclusion*

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
